

THERE IS NO SUBSTITUTE

How to Clean Light Kid Gloves. First rub with cream of tartar, leave for an hour and then rub with powdered alum and fuller's earth mixed in equal proportions. Next day brush them till the powder is removed and finish by rubbing with dry oatmeal to which a little powdered whiting has been added, afterward wiping this off with a dry cloth.

How to Sleep Comfortably.

M. A. Faret, a French scientist, has undertaken to teach us how to sleep, mays the New York American. He has experimented scientifically in the art of sleeping comfortably. As a result he advises the abolition of the pillow and the bolster. The only natural position for one to assume while sleeping is the horizontal. First one must get used to sleeping without a bolster. The next step, he says, is to remove the pillow, for not until then will the circulation of the blood be as free as it should be. In further explanation he says that the pillow and bolster keep the head and neck at an abnormal angle and that consequently the sleeper's entire body remains during the night in an uncomfortable position, and one which impedes the free course of the blood through the vessels and organs.

How to Cure Catarrh.

Salt will cure catarrh if used persistently. Make a solution as strong as can be easily borne and snuff it up into one nostril at a time, retaining it there a second or two. It should be used three times a day, and the water must be slightly warmed.

END OF BITTER FIGHT.

"Two physicians had a long and stubborn fight with an abcess on my right vrites J. F. Hughes of DuPont "and gave me up. Everybody thought my time had come. As a last resort I tried Dr. King's New Discovery for Consumption. The benefit received was striking and I was on my feet in a few days. Now I've entirely regained my health." It conquers all Coughs, Colds and Throat and Lung troubles. Guaranteed by W. A. Allen and G. W. Fisher, druggists. Price 50c, and \$1.00. Trial bottles free.

Larger Quantities.

CANCER CURED. Mr. W. W. Prickett, Smithfield, Ill. writes, Sept., 10, 1901: "I had been suffering several years with a cancer on my face, which gave me great annoyance and unbearable itching. I was useing Ballard's Snow Liniment for a sore leg, and through an accident. I rubbed some of the liniment on the cancer, and as it gave me almost instant relief, I decided to continue to use the liniment on the cancer. In a short time the cancer came out, my face healed up and there is not the slightest scar left. I have implicit faith in the merits of this preparation, and it cannot be too highly recommended." 25c, 50c, and \$1.00. For sale by all drug-

His Occupation.

WEAK AND LOW-SPIRITED.

A Correspondent Thus Describes His Experience.

"I can strongly recommend Herbine s medicine of remarkable efficacy or indigestion, loss of appetite, sour taste in the mouth, palpifation, head-ache, drowsiness after meals with disoses entirely removed my com-il wonder at people going on g or spending their money on as things, when Herbine is pro-and so cheap." 50c. a bottle at HARLAN ON TOBACCO.

Associate Justice's Advice as to the Use of the Weed and Liquors. Associate Justice John M. Harlan, whose completion of a quarter century of service in the supreme court was recently celebrated by a notable banquet in Washington, has for many years been the teacher of a Sunday school class at the New York Avenue Presbyterian church, says the New York Post's correspondent. In this capacity it fell to him not so very long ago to conduct the temperance lesson scheduled in the international series. With customary frankness, Mr. Harlan opened his talk by saying that he was really embarrassed by the subject set for the day's study and added that he felt himself to be not the kind of a person

in matters of this kind. He first addressed himself to tobacco, saying that he supposed he must have been using the article when he was ten years old, and perhaps earlier. "This is what stunted my growth," he remarked in a spirit of pleasantry fully appreciated by those who beheld his strikingly large proportions. He went on to say that it was a decidedly mean thing to attribute one's bad habits to the practices or teachings of the community from which one came instead of bearing the responsibility squarely. But, if the truth be told, there was little reason why the Kentucky boy of a half century ago should not use tobacco; all the men did and some of the women. The teachers in the schools did not discourage tobacco, as the justice remembers, and he was not sure but that they positively encouraged its

When his own sons were growing up he decided to break off the tobacco hab it and for a time was successful, but the attempted change in practices of so long standing made him very nervous and led finally to his abandoning his reform plan. His boys seemed to decide not to use tobacco independent of parental example, but guided perhaps by parental precept, and so as a father be accomplished what he really had in

In the use of alcoholics Justice Harlan commended "temperance" in distinction from total abstinence. For those persons who find drink a source of weakness or danger he would urge total abstinence, but held that this was a matter for which each should be his own judge. He quoted a number of passages from the Bible in commendation of the use of spirits in various occasions of life and expressed the opinion that the philosophic basis for these maxims still remained sound.

NEW BLOOD POISON CURE.

Washington Doctor Finds Serum Which He Claims Kills the Germ. Following quickly on Dr. Charles A. Barrows' cure of a case of blood poisoning comes the news of the discovery of a serum by Dr. Charles S. White of Washington which, he says, is almost a sure cure, especially in conjunction with Dr. Barrows' discovery of formalin. Blood poisoning is caused by bacilli named streptococci, from the Greek, because under the microscope the bacilli look like a chain linked to-

gether. Dr. White has cured a woman of the disease, says the New York Evening Journal. He says she was sinking fast when he was called. Her pulse was 120 and her temperature 104. Her blood showed the presence of countless streptococci. Dr. White ordered three doses of antistreptococci to be givenone at 4 p. m., the second at 10 p. m. and the third at 7 a. m. next morning. It was not necessary to give the third dose. At the time it was due the patient "was enjoying her first refreshing sleep for several days. Next day her pulse was 84 to the minute, temperature 100.6 degrees. Next day pulse 80, temperature 98.8 degrees, and subsequently her temperature never exceeded 99." In a month she was well.

FLOWERS OUT OF SEASON.

New Process Makes Those Which Bloom In Spring Blossom In Fall.

The London Times publishes an account from a correspondent of the "etherization" of plants, a new process whereby plants naturally flowering in the spring are made to produce blossoms during the previous autumn.

The process is simple. The plants are stored in a small galvanized tank. Then ether is poured into a small cup fixed to the top of the tank, whence, after the tank has been securely fastened, the ether is allowed to evaporate for a period of forty-eight hours. During this time the plants shed their leaves and may be described as being

in a state of intoxication. After this period the plants are exposed to the air for another period of forty-eight hours. This in turn is followed by a second period of etherization, after which the plants are removed to an ordinary forcing house and within two or three weeks begin to flower freely.

A Monster Pie.

Nobody's mother ever made a pie like that served to the guests of a pie baking company at a ball in Saengerbund hall, Brooklyn, the other night, says the New York Herald. It was the largest pie of which the world has any record. It weighed 110 pounds. In it were 200 eggs, 15 pounds of cocoanut. 6 pounds of mincemeat, 6 pounds of cranberries, 12 pounds of lemons. pounds of pineapple, 6 pounds of plums, 6 pounds of peaches, 50 pounds of sugar and chough other good things ing mental depressions and low to fill a barrel. It required half a ton the Herbine must be a unique of coal to bake this ple, and ten men tration for cases such as mine, for were employed fifteen hours in making it. A special steel plate had to be cast to bake it in. It was a combination of all the known kinds of pie and consti-tuted the entire midnight feast for sev-eral hundred plemakers. STAMFORD'S CAT HOAX. Only Candy Mice to Be Devoured a

Mouse Baiting Contest.

Stamford, Conn., makes its bow to the army of press agents the country over and points to the famous "mouse killing field trials" as a standard for their emulation, says the Philadelphia

That is all the episode amounts to-a press agent plot, pure, but not simple, in which an imaginative young man, aided and abetted by a group of clever women, hoaxed the country for a week. caused endless perturbation to societies and individuals, even started the wheels of justice revolving and incidentally obtained column upon column of advertising for the poultry and cat show which recently opened at

Stamford. The only cat ever designed to appear at the field trial, it is now known, is an automatic affair bought at a toy store. The only mice are of chocolate, manu-

factured by a New York confectioner. That the scheme was successful was evidenced from the outset. Less than a day later John P. Haines of New York. president of the Society For the Prevention of Cruelty to Animals, wrote Mrs. Homer Cummings a letter, and newspapers, both local and at a distance, began to attack the proposed trial editorially. The Connecticut society immediately held a meeting and appointed committees to see that the law was not violated. Ministers from the pulpit denounced it as an outrage. The Rev. De Loss Love, head of the Connecticut Humane society, announced that he would leave no stone unturned to prevent the sanguinary carnival. Mayor Leeds took up the cudgels and declared he would see that it was stopped. The

W. C. T. U. interfered, of course. Fuel was added to the flames daily by Frank Abbott, secretary of the poultry show. He announced the other day that he had been received a cover as that he had been received a cover as the secretary of the poultry show. that he had been promised 2,000 mice for the contest. He spoke truthfully. They were ordered of the confectione that day.

Gloomy thoughts become habitual to the dys-peptic. He looks on the dark side of things and every mole hill becomes a mountain. His condition affects his business judg-ment and mars his home relations. Dr. Pierce's Golden Med-

ical Discovery cures dyspepsia and other diseases of the organs of digestion and nutrition. It gives buoyancy of mind as well as health of body because it removes the physicial cause of mental depression.

It enables the perfect digestion and assimilation of food, and the body is strengthened by nutrition which is the only source of physical strength.

only source of physical strength.

"I was afflicted with what the doctors called nervous indigestion. Took medicine from my family physician to no avail," writes Mr. Thos. G. Lever, of Lever, Richland Co., S. C. "At night would have cold or hot feet and hands, alternately. I was getting very nervous and suffered a great deal mentally, thinking that death would soon claim me. Always expected something unusual to take place; was irritable and impatient, and greatly reduced in flesh. I could scarcely eat any thing that would not produce a bad feeling in my stomach. After some hesitation. I decided to try a few bottles of Dr. Pierce's Golden Medical Discovery and 'Pellets.' After taking several bottles of each, found I was improving. I continued for six months or more, off and on. I have to be careful yet, at times, of what I eat, in order that I may feel good and strong. I fully believe if any one suffering with indigestion or torpid liver or chronic cold would take Dr. Pierce's Golden Medical Discovery and 'Pleasant Pellets' and observe a few simple hygienic rules, they would soon be greatly benefited, and with a little perseverance would be entirely cured."

Biliousness is cured by the use of Dr. Pierce's Pleasant Pellets.

Approvat "I much admire men's honesty,"

The rogue exclaimed, with cynic glea.
"If all folk were as bad as me,
What competition there would be!" -Brooklyn Eagle.
